RE: JCOR Mechanical, Inc.

To Whom It May Concern:

We are writing, to give our highest recommendation of Randy Overstreet and Tom Duffy of JCOR Mechanical, Inc. Both of these individuals have been involved in projects associated with Fort Logan's Central Heat Plant. Most recently, they were the key individuals for the prime mechanical contractor, in the successful installation of a new steam generator. In the past they were also involved with projects associated with our high temperature heating hot system(s).

In addition, we have used JCOR for numerous mechanical equipment/system repair and replacement work both under planned and urgent scenarios. We have found them to be very competitive on their bid's; cooperative/accommodating during the processes and their workmanship is of the highest quality.

Sincerely

Chuck Gess, P.E.
Project Manager
