AVCF Domestic Water Line Replacement Project

To Whom It May Concern:

I wish to commend JCOR Mechanical for their professionalism in all areas connected to replacing the Domestic Water Lines in six of the Arkansas Valley Correction Facility Living Units, while they were occupied. Working in an occupied facility is extremely difficult, but JCOR Mechanical was exemplary in following all security procedures and adapting to all security policies ensuring the safety of all.

JCOR performed all required work for their bid amount and without any requests for change orders. During final inspection, the engineer could not find one Punch List item as all work was professionally completed and all the work areas were clean. I was extremely pleased with their office staff as well as their field crew and have no problem in recommending JCOR Mechanical on future projects.

If you wish, please feel free to contact me.

Sincerely,

Diana Oldemeyer
Project Representative
